Description of Problem

Please include a detailed description of the issues, as well as a description of and a copy of any professional studies, citations or reports from government entities, recommended solutions, and any cost information or estimates. If additional space is needed, please attach.

The underground gas line from the meter set to the building was found to have a leak. This line is old and corroded. It has been decided that a new gas will be installed and will not be installed underground. The leak was detected by a licensed contractor while performing an annual gas inspection at the school. Other than this problem the rest of the gas plumbing is sound. This contractor has been doing the District's annual gas inspections for a few years. Mr. Dan Demland has been informed and advised that the District acquire a proposal from this same contractor.

Attached with this application is a copy of the proposal submitted by the contractor.
